INDEX

Acrivos, A. *See* Kapoor & Acrivos

Alavyoon, F. *See* Bark & Alavyoon

Aref, H. On the equilibrium and stability of a row of point vortices, 167–181

Bark, F. H. & Alavyoon, F. Free convection in an electrochemical system with nonlinear reaction kinetics, 1–28

Berezin, Y. A. & Hutter, K. On vortex air motions above an axisymmetric source of mass, momentum and heat, 299–317

Crouch, J. D. & Spalart, P. R. A study of non-parallel and nonlinear effects on the localized receptivity of boundary layers, 29–37

Groves, M. D. Theoretical aspects of gravity–capillary waves in non-rectangular channels, 377–404

Henkes, R. A. W. M. *See* Janssen & Henkes

Hu, H. H. & Patankar, N. Non-axisymmetric instability of core–annular flow, 213–224

Hutter, K. *See* Berezin & Hutter

Janssen, R. J. A. & Henkes, R. A. W. M. Influence of Prandtl number on instability mechanisms and transition in a differentially heated square cavity, 319–344

Kapoor, B. & Acrivos, A. Sedimentation and sediment flow in settling tanks with inclined walls, 39–66

Kerchman, V. Strongly nonlinear interfacial dynamics in core–annular flows, 131–166

Kushner, P. J. & Shepherd, T. G. Wave-activity conservation laws and stability theorems for semi-geostrophic dynamics. Part 1. Pseudomomentum-based theory, 67–104

Kushner, P. J. & Shepherd, T. G. Wave-activity conservation laws and stability theorems for semi-geostrophic dynamics. Part 2. Pseudoenergy-based theory, 105–129

Longuet-Higgins, M. S. & Oguz, H. Critical microjets in collapsing cavities, 183–201

Mei, C. C. *See* Trulsen & Mei

Oguz, H. *See* Longuet-Higgins & Oguz

Ölçmen, S. M. & Simpson, R. L. An experimental study of a three-dimensional pressure-driven turbulent boundary layer, 225–262

Patankar, N. *See* Hu & Patankar

Purnama, A. The dispersion of chemically active solutes in parallel flow, 263–277

Riley, N. & Wybrow, M. F. The flow induced by the torsional oscillations of an elliptic cylinder, 279–298

Shepherd, T. G. *See* Kushner & Shepherd

Simpson, R. L. *See* Ölçmen & Simpson

Spalart, P. R. *See* Crouch & Spalart

Stern, M. E. Finite-amplitude three-dimensional instability of inviscid laminar boundary layers, 203–212

Trulsen, K. & Mei, C. C. Modulation of three resonating gravity–capillary waves by a long gravity wave, 345–376

Wybrow, M. F. *See* Riley & Wybrow
